EXPERIENCE

05/2022 - Present

Lead Designer, Unibuzz Networks Private Limited, Remote

Led the end-to-end design process for a global social media application targeting university students. Managed the entire journey from idea conception and UX research to framework planning, design system implementation, and prototyping. Oversaw UX deliverables to ensure a cohesive design process and alignment with project goals.

01/2021 - Present

UI / UX Designer, Freelance

Designing and developing websites and applications for young companies and startups. My work included UX deliverables such as identifying user problems, conducting user interviews, delivering design mockups, and building the fundamental design systems.

09/2021 - 05/2022

Frontend Engineer and Interface Designer, Nanum Digital Design Institute, South Korea

Managed the user interface of the company's main site through frontend coding languages, extensions and markups such as HTML5, CSS3, JSX and Javascript. Redesigned and remodeled the old company site to adjust to modern website standards such as responsiveness, multi-browser support, and React optimization .

SKILLS
